

## P124046

### AIR FILTER, SAFETY

#### Why Choose Donaldson Safety Filters?

Safety filters have two functions: to act as a backup to the primary filter and to protect the engine during primary filter servicing.

- Serve as a backup filter in case of primary filter damage or improper installation.
- Prevent contaminants from entering the clean side of the air intake system during primary filter servicing.
- Designed to plug rapidly if contamination finds its way past the primary filter, alerting operators about an issue.
- Recommend that safety filters are replaced with every third primary filter change unless there has been a failure of the primary filter.

#### Attributes

Outer Diameter	144.8 mm (5.70 inch)
Inner Diameter	116.3 mm (4.58 inch)
Length	431.7 mm (17.00 inch)
Efficiency Test Std	ISO 5011
Type	Safety
Style	Round
Media Type	Safety
