AIR FILTER, SAFETY

Why Choose Donaldson Safety Filters?

Safety filters have two functions: to act as a backup to the primary filter and to protect the engine during primary filter servicing.

- Serve as a backup filter in case of primary filter damage or improper installation.
- Prevent contaminants from entering the clean side of the air intake system during primary filter servicing.
- Designed to plug rapidly if contamination finds its way past the primary filter, alerting operators about an issue.
- Recommend that safety filters are replaced with every third primary filter change unless there has been a failure of the primary filter.

Attributes

| | |
|---------------------|---------------------|
| Outer Diameter | 85.6 mm (3.37 inch) |
| Inner Diameter | 73.5 mm (2.89 inch) |
| Length | 254 mm (10.00 inch) |
| Bolt Hole Diameter | 17 mm (0.67 inch) |
| Efficiency Test Std | ISO 5011 |
| Type | Safety |
| Style | Round |
