

Product Specifications

P609518 AIR FILTER, SAFETY RADIALSEAL

Why Choose Donaldson Safety Filters?

Safety filters have two functions: to act as a backup to the primary filter and to protect the engine during primary filter servicing.

• Serve as a backup filter in case of primary filter damage or improper installation.

• Prevent contaminants from entering the clean side of the air intake system during primary filter servicing.

• Designed to plug rapidly if contamination finds its way past the primary filter, alerting operators about an issue.

• Recommend that safety filters are replaced with every third primary filter change unless there has been a failure of the primary filter.

Attributes

| Outer Diameter | 295 mm (11.61 inch) |
|---------------------|---------------------|
| Inner Diameter | 236 mm (9.29 inch) |
| Length | 696 mm (27.40 inch) |
| Efficiency Test Std | ISO 5011 |
| Family | SSG |
